In Reference to Pollock & Sons Crane Hire Limited

To whom it may concern

I write to confirm that Mainzeal Construction have engaged the services of Todd & Pollock Crane Hire for approximately seven years without any accidents/incidents and when they returned to the industry in 2008 we resumed their services under Pollock Cranes without hesitation.

Pollock Cranes submitted their Health & Safety Manual which met Mainzeal Construction and industry safety requirements. We do not have any concerns with their capabilities to execute their part of the contract safely within tight frameworks and demanding time schedules.

Their company structure/planning right from the phone call, site visit, methodology, supplying the right crane, the right operator, correct supporting equipment and detailed Task analysis', I must say is with exceptional organisational skills which eliminates the stress out of this portion of our contracts.

We highly commend and recommend Pollock Cranes on their positive work performance. They are a bench mark for other subcontractors and suppliers of services to follow. .

Yours faithfully

Terry Murphy
Mainzeal Construction Waikato/ Bay Of Plenty Construction Manager
