**TO WHOM IT MAY CONCERN**

***Re: Pollock & Sons Crane Hire Ltd***

Stahlton Engineered Concrete Hamilton Branch recently won a high risk project which as well as being fast tracked it comprised of several oversized precast concrete products which ranged from 26 to 67 ton each.

We consulted Pollock & Sons to carry out the lifting of the entire project which involved them supplying specialized slings and ropes and craneage suitable for this particular project.

I believe Pollock & Sons carried out the project in a very professional manner with a high standard of safety and operator competency. The equipment was all well presented.  
Pollock & Sons crew worked well with the other subcontractors on site with a can do attitude.

Stahlton Engineered Concrete requires a high standard of health and safety in our factory which includes any subcontractor in which Pollock & Sons excelled in. We now see Pollock & Sons as an integral part of our operation and will be looking forward to working with them to carry out our future lifting requirements.

I would have no hesitation in recommending Pollock & Sons to other organizations as it would be a hard to beat service.

Yours faithfully
