To Whom It May Concern

Waikato Steel Fabricators Ltd have used Pollock & Sons Crane Hire Ltd on numerous occasions and have found their service to be impeccable.

The cranes we used have ranged from 25 tonne to 300 tonne. We have found the competence of their operators to be outstanding and more than obliging when it comes to confinements and the location of some of the jobs.

The operators are very safety conscious and will work in with the instructions of the Dogman and within the rating of the crane. Their onsite times are punctual and their communication is always excellent. If I have rung to book a certain size crane and it is not available they will communicate with me and supply another crane that will suit the location.

Our work is on occasions performed after hours and Pollock & Sons Crane Hire Ltd will deliver every time. Their representatives I found to be very honest and down to earth and can be contacted at any time.

I have no hesitation in recommending their services.
